

- 1 Introduction
 - Emotional Consequences of Expectations
 - Tension Response
 - Imagination Response
 - Prediction Response
 - Reaction Response
 - Appraisal Response
- T1.1 Response systems
- F1.1 Schematic diagram of the time-course of the “ITPRA” theory of expectation.

- 2 Surprise
 - F2.1 Schematic diagram of the brain mechanisms involved in the fear response.
 - Contrastive Valence
 - Three Flavors of Surprise

- 3 Measuring Musical Expectation
 - F3.1 Average moment-to-moment uncertainty for Balinese and American musicians listen to an unfamiliar traditional Balinese melody.

- 4 Auditory Learning
 - F4.1 Average response times for musician listeners to hear an isolate tone as a specified scale degree.
 - F4.5 Sample exposure stimuli showing the long-term statistical probabilities of pitch-to-pitch transitions.

- 5 Statistical Properties of Music
 - F5.1 Frequency of occurrence of melodic intervals in notated sources for folk and popular melodies from ten cultures.
 - F5.2 Proportion of non-unison melodic intervals that ascend in pitch.
 - T5.1 Probabilities for step-step- movements in a large sample of Western and non-Western musics.
 - F5.3 Watt’s (1924) analysis of intervals in Schubert Lieder. Larger intervals are more likely to be followed by a change of melodic direction than small intervals.
 - F5.5 Number of instances of various melodic leaps found in a cross-cultural sample of melodies.
 - F5.6 Average contour for 6,364 seven-note phrases taken from *The Essen Folksong Collection* (Schaffrath 1995).

- 6 Heuristic Listening
 - F6.1 “Brownian” or “random walk” melody.
 - F6.2 “Johnson” or “white noise” melody.

- 7 Mental Representation of Expectation (I)
 - F7.2 Information theoretic analysis of “Pop Goes the Weasel” showing changing of information (in bits) as the piece unfolds.
 - F7.4 A hypothetical mental network for pitch-related representation.

- F7.5 Four objects illustrating the failure to code spatial interval.

- 8 Prediction Effect
Exposure Effect
The Role of Consciousness

- 9 Tonality
 - T9.1 Scale Degree Qualia
 - F9.1 Distribution of scale tones for a large sample of melodies in major keys (>65,000 notes).
 - F9.2 Distribution of scale tones for a large sample of melodies in minor keys (>65,000 notes).
 - T9.2 First-order scale-degree probabilities (diatonic continuations)
 - T9.3 First-order scale-degree probabilities (chromatic continuations)
 - F9.7 Schematic illustration of scale-degree successions for major key-melodies
 - F9.9 Schematic illustration of the amount of *flexibility* or (conversely) *tendency* for different scale degrees in major-key contexts.

- 10 Expectation in Time
 - F10.2 Effect of temporal position on accuracy of pitch judgment.
Long-Range Contingent Expectations
The Pleasures of the Downbeat
Nonperiodic Temporal Expectations
 - F10.13 Graph representing the relative durations of three-note rhythmic patterns.
 - F10.14 Relative durations for two 3-note rhythms tapped by musicians.
 - F10.15 Categorical boundaries between various perceived three-note rhythms.

- 11 Genres, Schemas, and Firewalls
 - Context Cueing
Undergeneralization
Starting Schema
 - T11.1 Unprimed listener expectations
Schema Switching

- 12 Mental Representation of Expectation (II)
 - Episodic Memory
 - F12.1 Recognition measurements for the openings of four melodies.
Dynamic Expectations
 - F12.2 Example of a chimeric melody where one melody elides into another.
Conscious Expectations

- 13 Creating Predictability
 - Veridical Familiarity
Schematic Predictability
The Anticipation
Hypermetric Anticipation

F13.9 Schematic illustration of chord progressions in a sample of baroque music.
F13.11 Schematic illustration of chord progressions in a sample of seventy Western popular songs ...

Style and form

Dynamic Predictability

14 Creating Surprise

T14.1 Reported qualia for chromatic median chords in a major key context

T14.2 Reported qualia for chromatic median chords in a minor key context

T14.3a Metrical context for ascending melodic intervals

T14.3b Metrical context for descending melodic intervals

15 Creating Tension

The Feeling of Anticipation

The Suspension

F15.3 Prototypical suspension.

T15.1 Summary expectation analysis of a suspension

F15.4 Oddball event.

F15.5 Oddball event from figure 15.4 is transformed into an appoggiatura.

T15.2 Summary expectation analysis of an oddball note

T15.3 Summary expectation analysis of an appoggiatura

Premonition

Climax

Sweet Anticipation --- The Role of Consciousness
